Kang_min_kim@naver.com

Analytical and proactive problem solver with collaboration and communication skills. Currently completing a degree in Systems Management Engineering with specializing in machine learning, data analysis, and system optimization. Experienced in developing predictive models, handling data drift, and applying ML to real world datasets through internships and academic projects. Demonstrated ability to improve model robustness and develop scalable solutions.

Education

Sungkyunkwan University (Natural Sciences Campus)

2066 Seobu-ro, Jangan-gu, Suwon-si, Gyeonggi-do 16419, Republic of Korea

B.S. in Systems Management Engineering

Feb 2021 – Present

GPA: 4.03 / 4.5

Experience

TechnoMatrix Lab Undergraduate Intern

2066, Seobu-ro, Jangan-gu, Suwon-si, Gyeonggi-do 16419, Sungkyunkwan University, Engineering Building2, 27410
Jul 2025 – Oct 2025

- Developed adaptive retraining algorithm to address data drift
- Applied model retraining techniques to POSCO dataset
- Improved model robustness under dynamic data environments

Activities

Student Council, Systems Management Engineering

President (Nov 2025 – Present)

- Led career-related content development and guidebook creation
- Organized academic and networking events
- Established competition community system

iSME Academic Society

Member (Mar 2025 – Feb 2026)

- Presented research on iTransformer and implemented model architecture
- Conducted paper review on concept drift detection algorithms
- Developed wafer defect classification and visualization system using CNN

Skills

Python, C, Machine Learning, Deep Learning, Data Analysis
